The Xenith Team

The Xenith Team

The Xenith Advantage

The Xenith Advantage

All Fertility treatments under one roof- Xenith caters to every treatment modality in male and female infertility under a single roof making it easy to give detailed attention to every aspect of fertility care

Individualization of treatment- Having an experienced and dedicated team to scrutinize the various causes of infertility makes it possible to target the cause, treat it and achieve results with simpler methodologies. The intention is to achieve a pregnancy with intervention being done only when and where required.

Speed to Success in Treatment- Excellent success rates achieved in each treatment cycle minimizes time to successful outcome and reduces treatment fatigue for patients.

Transparent counselling- Each couple is explained every small detail of the treatment and kept informed of every step in terms of progress and costs, making the atmosphere comfortable and reassuring.

The Xenith Advantage

Good success rate in recurrent implantation failures- Xenith individualizes treatment for couples who have had previous IVF failures and has excellent success rates in this category.

Cost –effective Treatment- Xenith believes in looking at value addition and provides a very cost effective strategy to achieve the end result faster

In House experienced Embryologists and IVF Technicians- The Embryology Lab at Xenith is managed by highly experienced embryologists with vast experience in every laboratory aspect of gamete and embryo handling. Strict vigilance thus translates to superior success rates.

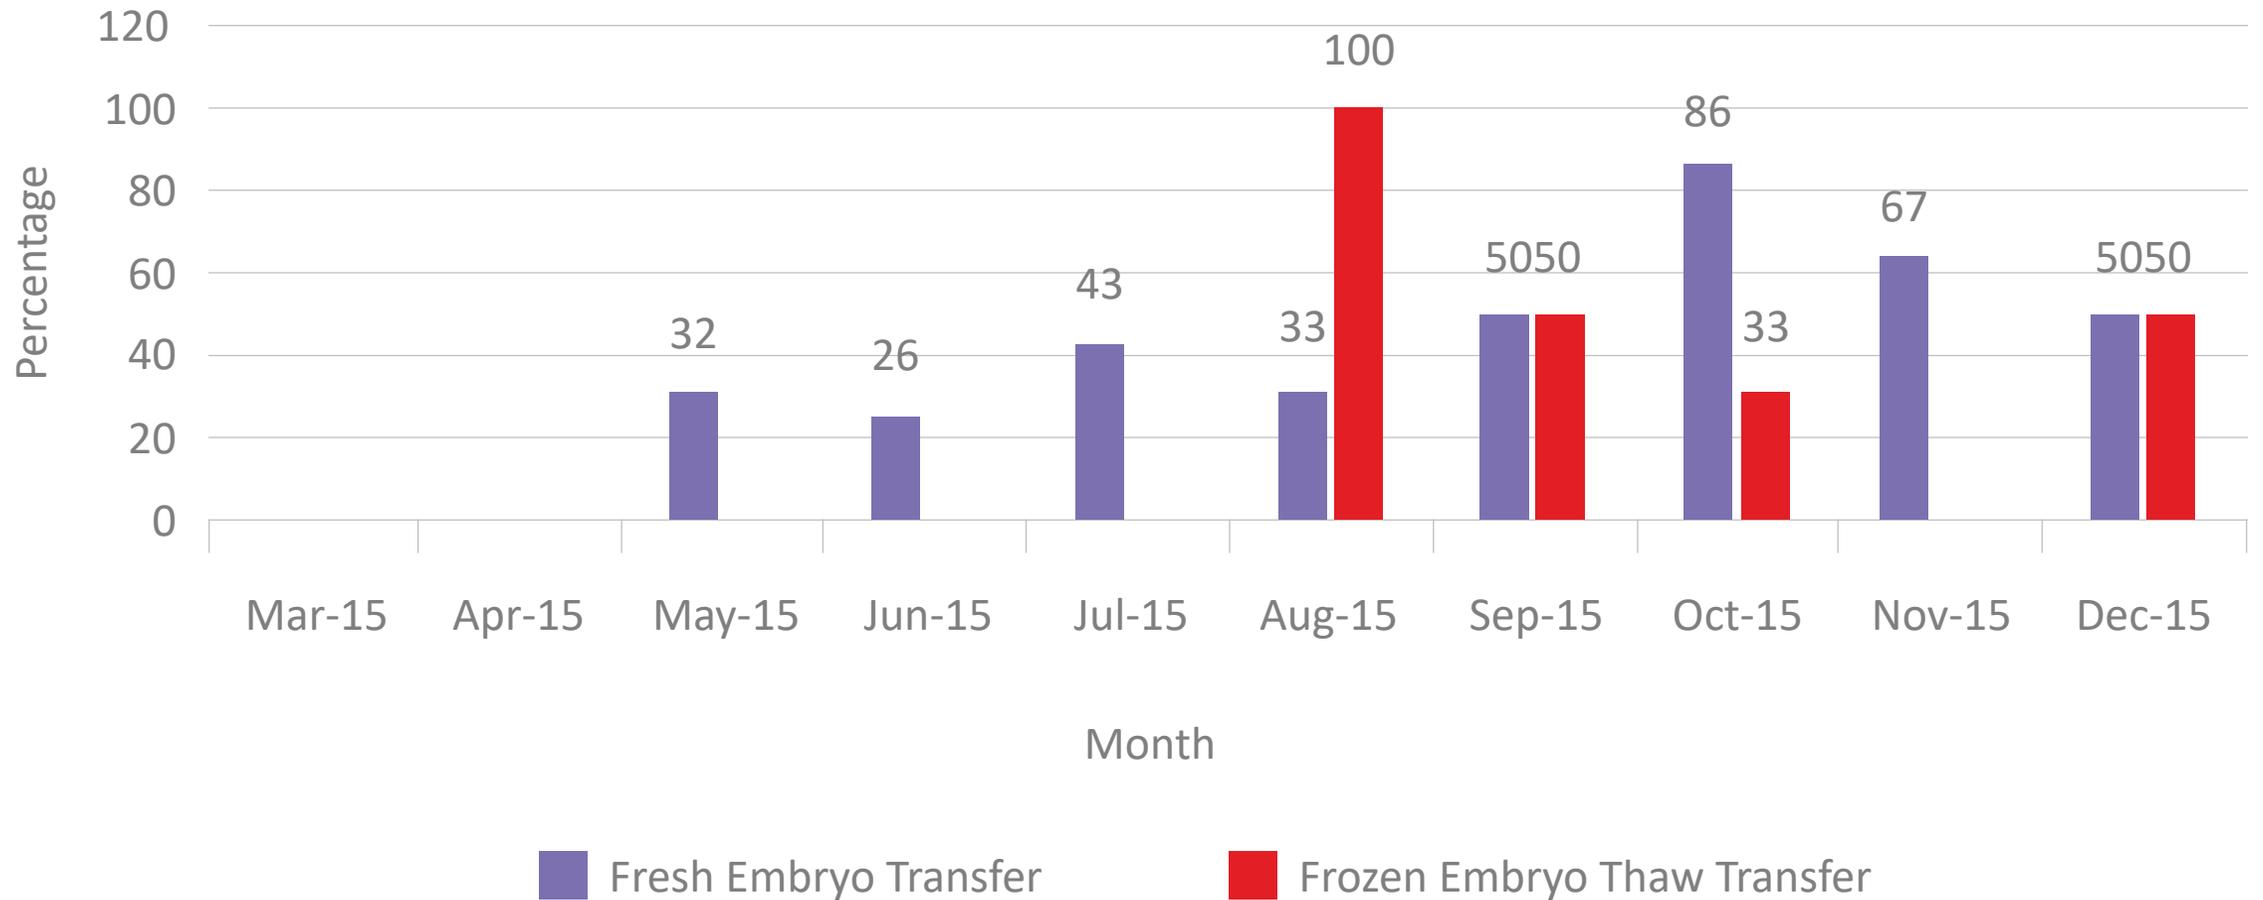

Specialized Center for Severe Male factor Infertility- Successful outcomes in cases of severe male factor and azoospermic patients achieved.

A WORLD CLASS INFRASTRUCTURE

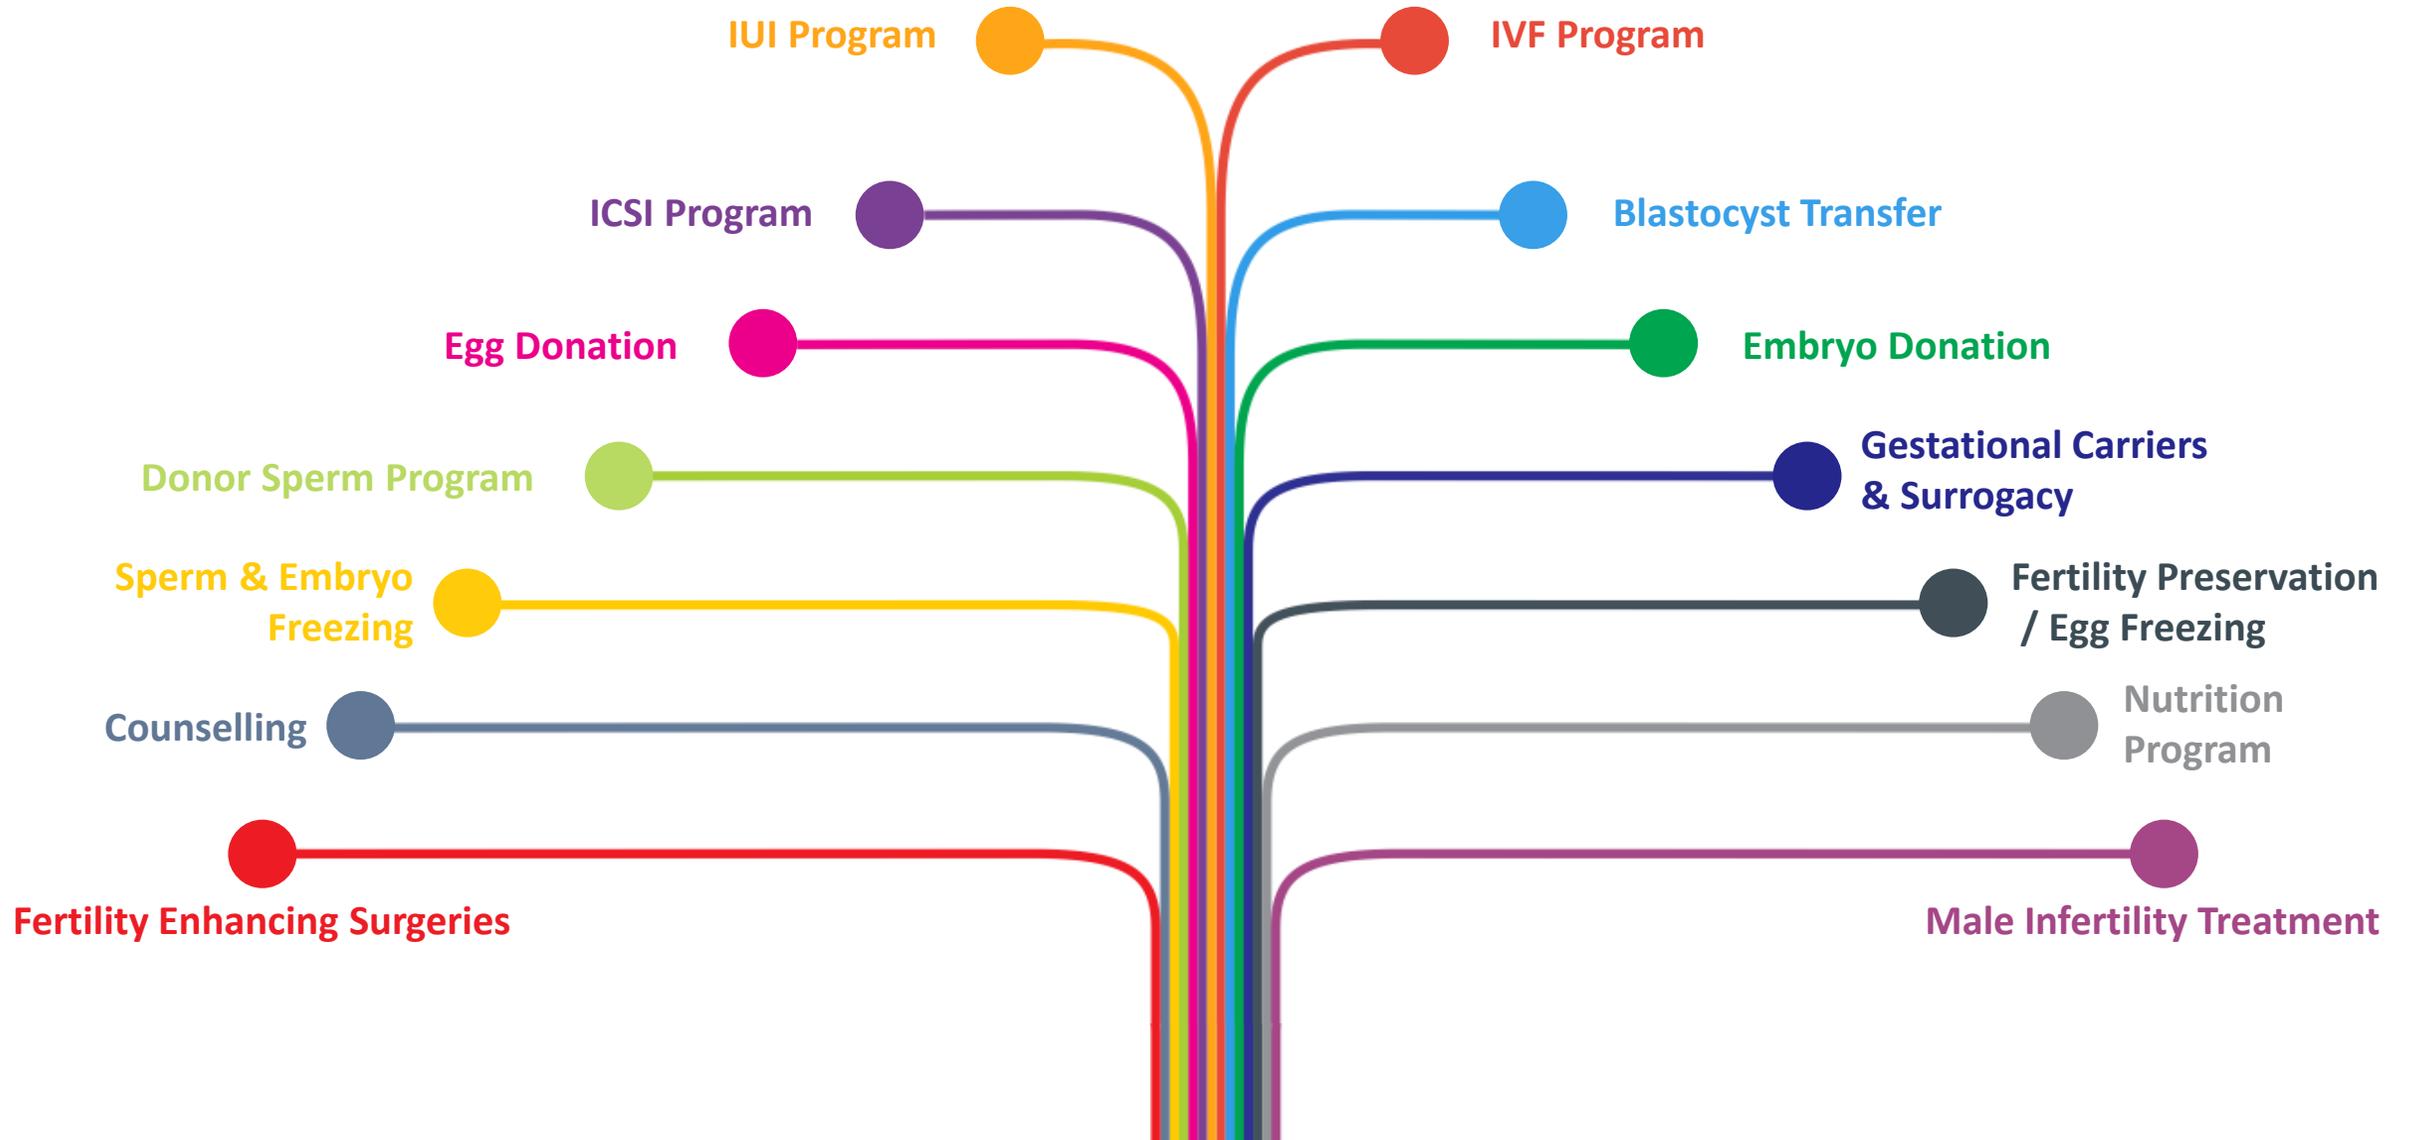

Xenith: A World Class Infrastructure

XENITH : AREA of EXPERTISE

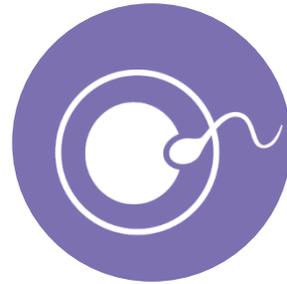

Infertility Treatments

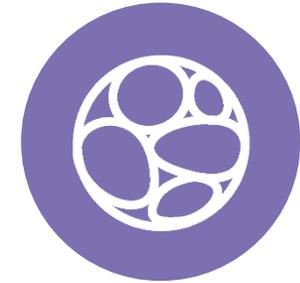

IVF, ICSI, Blastocyst Transfer

IVF- In-Vitro Fertilization process fertilizes Woman's egg with the sperm in a culture dish

ICSI- In this case, the sperms are injected through the zona (shell of the egg) and in the center(cytoplasm) of the egg

Blastocyst Transfer- Embryo developed in the lab in incubator for 5 or 6 days. Higher pregnancy rates obtained

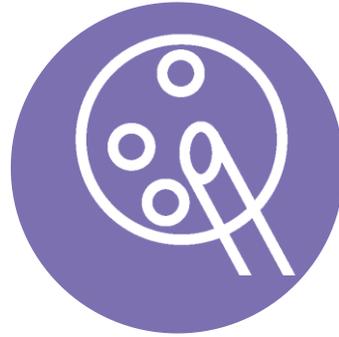

Cryopreservation

Cryopreservation is the technique to freeze sperms, eggs and embryos. These frozen gametes and embryos can then be used when required.

Sperm Freezing

Egg Freezing

Embryo Freezing

Excellent success rates with freezing techniques at Xenith

Fertility Enhancing Endoscopic Surgeries

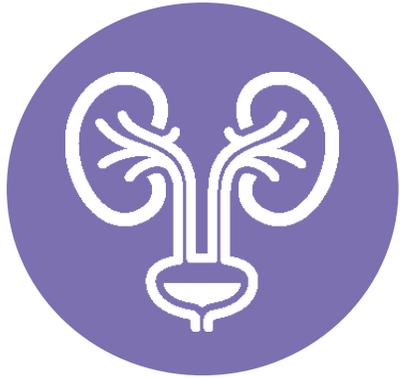

Correcting the factors causing infertility like tubal problems, adhesions and endometriosis significantly increases chances of pregnancy.

Expertise is required in handling these cases so as to ensure enhancement of fertility

Eg..... Endometriosis, Tubal Cannulation & Hysteroscopic adhesiolysis.

Advanced Andrology (Male Infertility)

Andrology is a sub-speciality dealing with detailed management of Male factor Infertility which accounts to nearly 40-50% of the causes

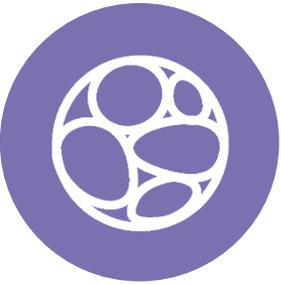

At Xenith Specialized Andrology OPD caters to every problem related to Male infertility and sexual dysfunction.

- Medical management of low sperm count and motility
- Surgical sperm extraction techniques, including Micro TESE for difficult cases
- Varicocele surgery
- Erectile problems
- Vibration Therapy

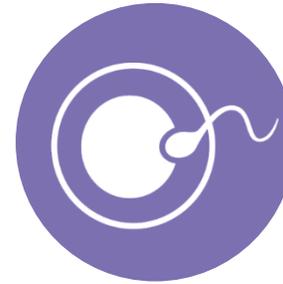

3rd Party Reproduction

Egg Donation- Women with low or absent eggs can accept eggs from a young fertile, willing donor

Embryo Donation- Donor embryos formed using donor eggs and donor sperms are used if the couple has recurrent poor embryos

Donor Sperm- Good sperms from a fertile male donor is used in cases of absent or very low sperms in the male partner

Surrogacy- The embryo formed from the couples eggs and sperms is placed in the uterus of another woman willing to carry this pregnancy

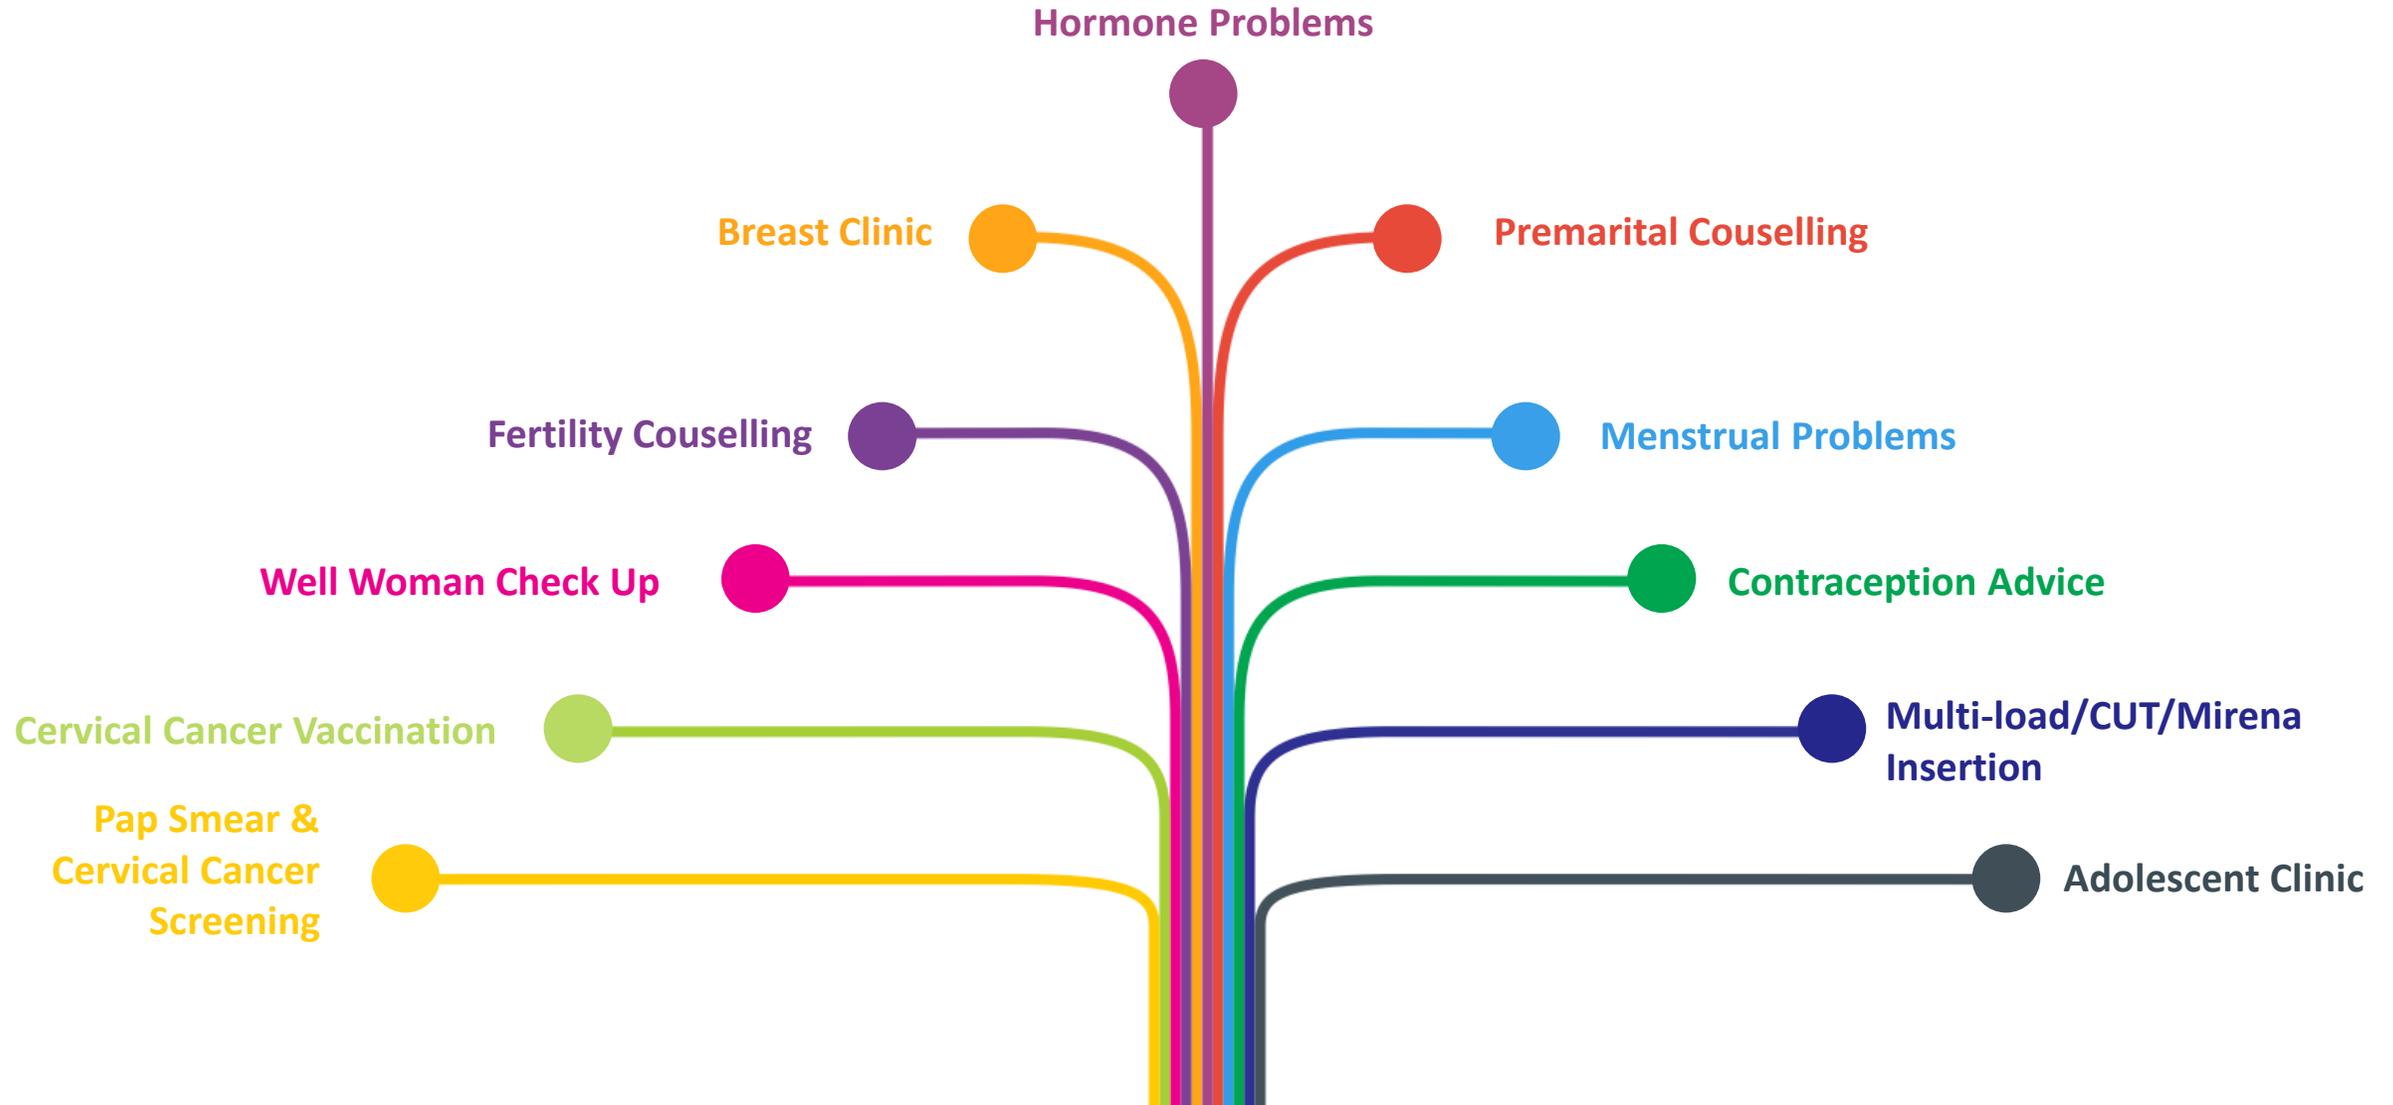

IUI treatment involves a process of increasing number of sperms by processing the semen and inserting this into female womb through the catheter.

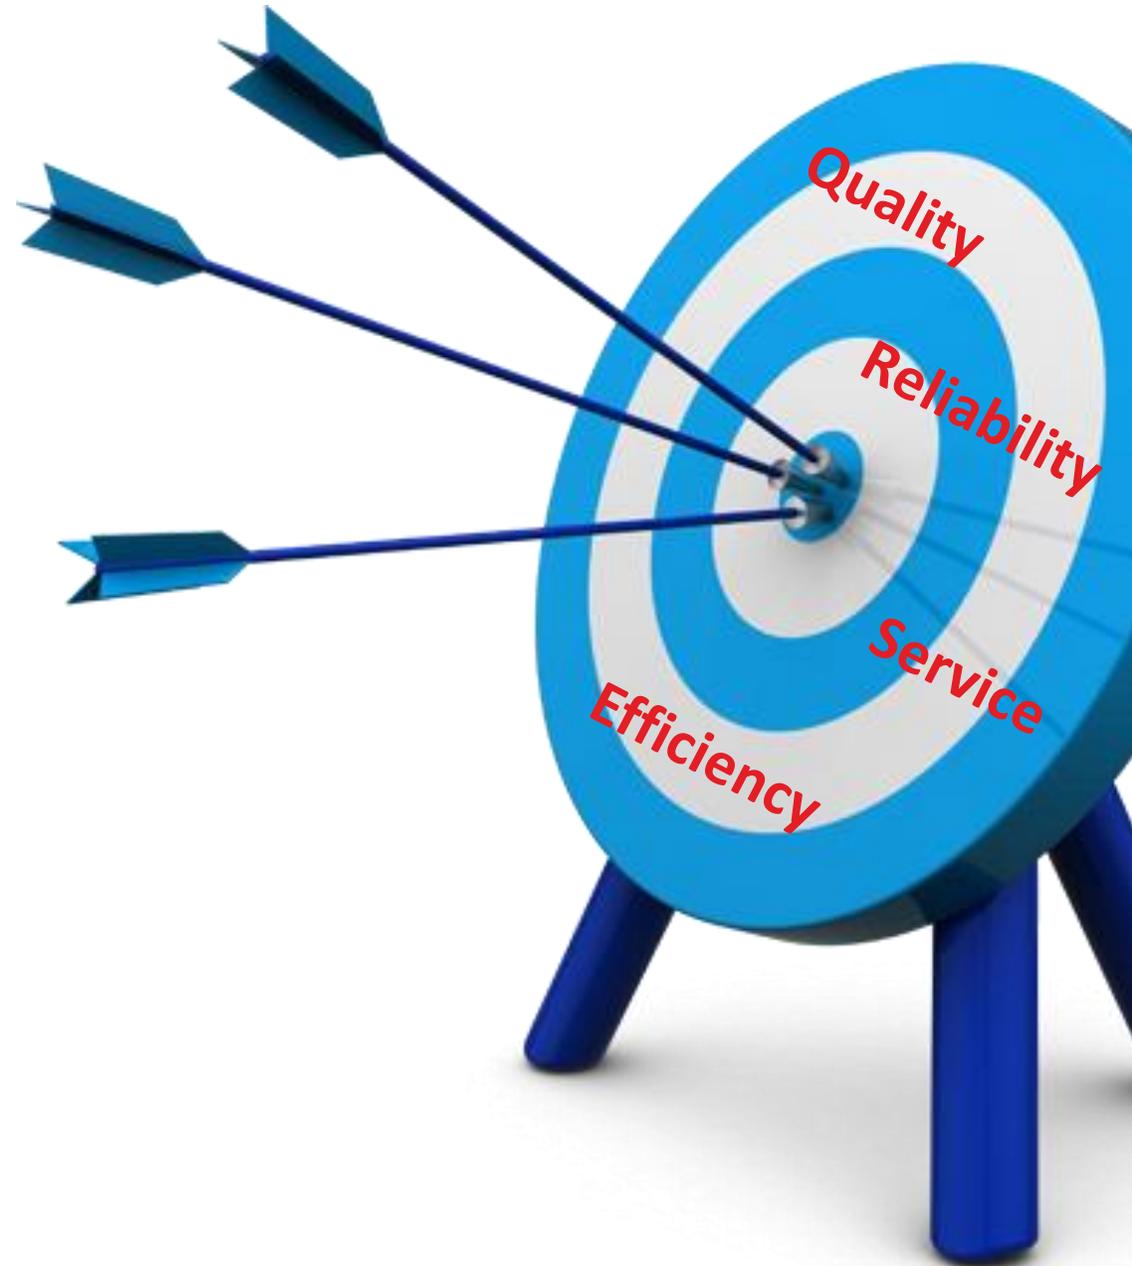

Detailed counselling and Transparency in each step.

Gynaecology Service Treatments

Testimonials

"I have been undergoing treatment for last 3 years at Hyderabad. I started my treatment with Dr.Mamta Dighe mam in the month of may of this year. She is very friendly and cordial towards her patient. She is not money oriented like the other doctors. She listens and understands the problems of her patients with patience. I had got positive result with in 5 months of treatment. I am thankful to Mamta Dighe mam and wish her all good fortunes. Her staff are also cordial and friendly in nature. I am also thankful to Poonam mam. She is also a friendly doctor."

"We were trying to conceive from a long time and we had visited few other doctors without success. But then we read about Dr. Mamta Dighe madam on Practo and visited her clinic. She explained everything very well and was very soft spoken. She understood our problem completely and prescribed few tests and medicines. Then just in less than 3 months we got a positive result for which we were waiting for a really long time. We really want to thank Dr. Mamta Dighe madam for her efforts and genuineness. We recommend her to every couple who are trying for a long time without success because getting a right doctor at right time is very important. Many many thanks to Dr. Mamta."

"I can't thank enough to the doctor, embryologist and rest of the staff for everything they helped us with. For such a specialized treatment really need a experienced and skilled doctor and Dr Mamta Dighe is the best in all aspects. She listens patiently, understand, diagnose well & gives the best line of treatment. She never recommend any unnecessary treatments or test. you are in GOOD hands."
